The Access Center
The Access Center, located in Brookhaven's Emergency Department, offers individualized care in a warm, supportive atmosphere.

Our professional team conducts a thorough psychiatric and physical evaluation.

The team then works with the patient, family and other healthcare professionals to develop a course of treatment that best meets the needs of the patient. This may include inpatient admission, securing an outpatient appointment, or communicating with your current treatment providers to coordinate care.

The Access Center, open 24 hours, 7 days a week, can also be used as a community resource that can provide information on Behavioral Health issues and services available for the community.

“At Brookhaven’s Behavioral Health Services our focus is on you.”

Inpatient Services
Behavioral Health Services at Brookhaven has won national awards for excellence in leadership and patient care. Our team of professionals are committed to provide a quality treatment program for individuals in need.

The Behavioral Health Inpatient Unit is a twenty-bed adult acute care unit for the diagnosis and treatment of mental illness, providing crisis stabilization, medication adjustment and psychotherapeutic family and patient intervention. The treatment team develops an individualized plan of care for each patient including discharge planning and referral for continuing treatment. Evaluation and admission to the unit is provided through the Access Center.

Behavioral Health at Home
Our psychiatric home health service provides the patient with an individualized care plan promoting self-sufficiency and reintegration into the community. The home health program sends specially trained nurses into the home for evaluation, treatment and medication management.

For individuals with skilled nursing needs, the program can also provide Social Work, Physical Therapy, Occupational Therapy and Home Health Aide Services.

Outpatient Behavioral Health
This service provides comprehensive, mental health treatment services for children and adults. Individual, group and family psychotherapy as well as psychopharmacologic treatment and crisis intervention are provided within a program structure that emphasizes patient and family participation in the treatment process.

Outpatient Chemical Dependency Treatment
This program provides assessment, education, individual and group counseling for adults in need of chemical dependency treatment.

Behavioral Health and Chemical Dependency Service Programs are located in Patchogue and Shirley.
