

INTRODUCING BROOKHAVEN MEMORIAL HOSPITAL MEDICAL CENTER'S NEW

# CENTER FOR WOUND CARE & HYPERBARIC MEDICINE

## When a wound won't heal...

EACH YEAR APPROXIMATELY 5 MILLION Americans will suffer from chronic wounds caused by diabetes, circulatory problems or many other conditions. We can help. Studies have shown that specialized wound care treatment, which may include hyperbaric medicine, has accelerated wound healing, reduced amputation rates and helped patients avoid hospitalization. On an out-patient basis our specially trained staff at the Center for Wound Care and Hyperbaric Medicine will provide the services you need to help you resume an active and healthy life. Start living again. Coming in 2007, be sure to look out for our new state-of-the-art 8,000 sq. ft. center with room for up to six hyperbaric chambers, meeting the growing needs of our community. We will open next door to our present location.

*Ask your physician or call us at:*  
**631-687-4190**
